**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-13 and 16 are allowed.

The following is an examiner's statement of reasons for allowance: 1-13 and 16.

Claim 2-13 and 16 are dependent on claim 1.

With respect to claim 1, Admitted Prior Art (APA) is the closest prior art to the application invention, which discloses a system and method teaches automated interactive management of a communication service account where the account data comprises parameters establishing rules of use of at least one subscribed communication service.

Lesley (U.S. 6333976) teaches a method and apparatus for providing prepaid telecommunications services. Instead of requiring a customer to carry around one or more prepaid telephone calling cards, a communications network-based solution is provided that facilitates both prepayment and use of prepay telecommunications services.

Davitt (U.S. 6137872) teaches a methodology associated with the pre-paid calling card allows the subscriber to continue a call upon depletion of the card.

However, the prior art of record fails to disclose or render obvious a system or method for automated interactive management of a communication service account comprising a server and *modifying a first account parameter and a second account parameter in response to a customer-initiated signal, wherein the first account parameter is a number of calling plan minutes allocated for a first time period and the second account parameter is a number of calling plan minutes allocated for a second time period.*
